Expansion Goals & Key Question

- Enter the Brazilian market within one year.
- Maintain Eniac's premium delivery standards and protect brand reputation.
- Can Magist's logistics performance support Eniac’s premium expectations?

Made with Prezi

Product Value Discrepancy: Eniac vs. Magist

Eniac: High-Value Technology

average item price of 514€

average order value of 710€

Eniac handles high-value technology products.

Magist: Lower-Value Goods Focus

average order price of 120.65€

Magist's logistics are primarily designed for lower-value goods, significantly less than Eniac's products.

Delivery Time Benchmarks in Brazil

Magist's performance compared to typical market delivery times

8-13 Days

Typical delivery time in the Brazilian market (2018).

12 Days

Magist's average delivery time, at the slower end of the market.

30 Days

Some Magist deliveries can take up to a full month, indicating variability.

Made with Prezi

Delivery Reliability Risks with Magist

- 7.3% of Magist's deliveries experience delays, impacting customer satisfaction.
- Larger products are delayed more frequently, a concern for Eniac's electronics.
- High variability exists, with some deliveries extending significantly beyond the average timeframe.

Strategic Recommendation: Avoid Magist as Primary Partner

Value mismatch: Eniac's premium (514€ avg item) is incompatible with Magist's low-value focus (120.65€ avg item).

Delivery risk: A 12-day average delivery and 7.3% delayed orders pose significant threats to brand reputation.

High variability: Deliveries extending up to 30 Days increase operational complexity and customer dissatisfaction risk.
